ICT- Scholars Promoting Digital Literacy And Online Safety In Education

Course Motivation: ICT Scholars Promoting Digital Literacy And Online Safety In Education course aims to address the growing need for digital literacy and online safety in education. In an increasingly digital world, it is crucial for educators to equip themselves with the knowledge and skills to navigate the digital landscape responsibly and effectively. This course will empower educators to promote digital literacy and ensure the online safety of their students, preparing them for a future where technology plays a central role.

Course Description: This 7-day training course provides comprehensive guidance on promoting digital literacy and online safety in education. Participants will explore various aspects of digital literacy, including online communication, media literacy, information evaluation, and responsible digital citizenship. Additionally, the course will focus on strategies for safeguarding students against online risks and fostering a positive and secure online learning environment.

Teaching Method: The course will employ a combination of interactive workshops, hands-on activities, expert-led seminars, and group discussions. Participants will have the opportunity to learn from industry experts, including professionals from the academic sector, through seminars and panel discussions. Practical activities and case studies will facilitate the application of knowledge and the development of effective strategies for promoting digital literacy and online safety.

Course Objectives:

1. Develop a deep understanding of digital literacy and its importance in education.
2. Equip educators with the necessary knowledge and skills to promote responsible digital citizenship.
3. Raise awareness about online risks and teach strategies to ensure the online safety of students.
4. Provide guidance on incorporating digital literacy and online safety into curriculum planning and instructional practices.
5. Foster collaboration and knowledge sharing among educators to build a community of cyber-savvy scholars.

Day-by-Day Program:

Day 1: Introduction to Digital Literacy and Online Safety

- Overview of the course objectives, structure, and learning outcomes.
- Understanding the importance of digital literacy and online safety in education.
- Exploring the current landscape of digital technologies and their impact on society.

Day 2: Online Communication and Digital Etiquette
